What to Watch, in Order

State of Minnesota v. Derek Chauvin (Hennepin County District Court, 2021) – focus: causation of death

Total: about 6–7 hours (about 5 hours at 1.25× speed). Check that each link plays before relying on it.

1. Opening statements – 29 March 2021 (~1.5 h)

- Video: ABC News – Opening statements, or the full Day 1 stream (openings come first).
- Prosecutor Jerry Blackwell spoke for about an hour; defence lawyer Eric Nelson for just under 30 minutes.
- **Listen for:** how each side frames causation – Blackwell's "9 minutes 29 seconds" versus Nelson's drugs and heart disease.

2. Dr Martin Tobin, prosecution expert – 8 April 2021 (~2 h)

- Video: YouTube – Dr Tobin testifies
- Transcripts: Rev part 1 and Rev part 2
- **Key moment:** he points to the video and says "that's the moment the life goes out of his body". A juror later said his testimony was the most compelling of the trial.

3. Dr Andrew Baker, medical examiner – 9 April 2021 (~1.5 h)

- Video: YouTube – Day 10, Dr Andrew Baker
- **Key moments in the cross-examination:** he said the knee position would **not** anatomically cut off the airway; he admitted that "in other circumstances" the fentanyl level could be fatal, and that if Floyd had been found alone at home he would have certified the death as fentanyl toxicity.
- A good example of cross-examination as a tool for testing evidence: the prosecution's own expert helped both sides.

4. Dr David Fowler, defence expert – 14 April 2021 (~1 h, cross-examination only)

- Video: Court TV – Dr David Fowler part 3 (likely the cross-examination), or ABC News
- **Key moment:** Blackwell's tense cross-examination about the carbon monoxide theory.

5. Dr Tobin recalled in rebuttal – 15 April 2021 (a few minutes)

- Video: Fox 9 – Tobin rebuttal. He answered Fowler's carbon monoxide theory.

6. Closing arguments – 19 April 2021 (causation parts only)

- Video: PBS NewsHour – closing arguments
- Transcript: Rev – prosecution closing. Search it for "cause" or "Fowler" to find the relevant parts quickly.

Tip: finding exact moments

On YouTube, click "…more" under the video → "Show transcript". Search for a word (e.g. "fentanyl", "carbon monoxide", "cross") and click it to jump to that minute. Note the timestamps as you go – you can use them in your footnotes.
